THE INDUSTRY'S HIGHEST CERTIFICATION

NAID

AccuShred is the first company in Northwest Ohio and Southeastern Michigan to obtain our industry's highest professional certification for document and data destruction. This "AAA" Certification is granted by the National Association for Information Destruction (NAID). In order to achieve this designation we were independently audited on 24 key aspects of our business with regard to procedures, policies, processes, stability and security. This certification confirms the security you expect.

AccuShred has added an additional level of security by becoming one of the first 20 firms in the United States to purchase Professional Liability Insurance specifically designed to cover document destruction service providers.

AccuShred will also help your company understand and comply with ever-changing privacy regulations, such as HIPAA, FACTA and Gramm-Leach-Bliley.

AccuShred is a division of State Paper & Metal, a respected name in the recycling industry for more than 70 years. We're proud of being part of a long tradition of outstanding customer service.

**Call us for a no-obligation estimate.
AccuShred will outline a secure,
cost-effective program for your data
destruction needs.**

TEN REASONS TO USE ACCUSHRED

1. Your time is money. AccuShred can shred in minutes what it would take office staff hours to accomplish.
2. When you use AccuShred, you are using a AAA Certified company accredited by the National Association for Information Destruction. We meet or exceed the highest professional standards in the industry, giving you the maximum protection from lawsuits and other liability.
3. AccuShred ensures a Chain of Custody to protect your information during the entire shredding process. We use secure, locked containers in your workplace and bonded employees to safely transport your materials to our shredding facility. Your information is completely protected until it is destroyed.

8. Employee issues. Most employees think that shredding is a tiresome task that takes them away from their other duties. In addition, lower wage employees are the most likely to realize the value of information to competitors and have the economic motivation to capitalize on their access to this information. Let our trained, bonded and insured staff take over your shredding for as little as \$1 a day.
9. Get the information off site. Identity theft often occurs from garbage acquired outside office buildings. We co-mingle your materials with those of other companies, adding one more level of security.
10. It's easy. The process is simple. The change is seamless. The cost is painless. The results are excellent.

4. Completely destroy sensitive electronic data and equipment. When AccuShred disposes of your old computers and hard drives, we do so in a manner that permanently destroys all data.
5. AccuShred's process is completely responsible to the environment. We keep your discarded electronics waste out of landfills to prevent the release of dangerous toxins or pollutants, and we send all shredded paper to paper mills for recycling.
6. No more equipment hassles. Small shredders often clog and burn out, and commercial shredders are expensive to buy and maintain. Both are accidents waiting to happen.
7. AccuShred builds your company's positive image. With your commitment to the protection of confidential information, you show your concern for employees and clients.
